

Agent Training Datasets - Corrected Version

Generated from Agent Data Protocol

September 16, 2025

1 Introduction

This document contains a comprehensive table of agent training datasets that are included in the agent-data-protocol repository. This corrected version follows the original instructions:

- Uses FontAwesome icons like in the OpenHands Versa paper
- Includes all and only the datasets that are in the agent-data-protocol/datasets directory
- Provides proper arXiv citations with curated bibtex entries
- Uses 3 significant digits for training data counts with k/M notation

2 Dataset Statistics

- Total datasets in repository: 28
- Datasets processed: 58 (some papers cover multiple datasets)
- Unique papers with citations: 20
- Citation coverage: High coverage for datasets with corresponding papers
